Flute Types

Each Windward Pratten flute has a tuning-slide and an endcap with an adjustable cork assembly. The flutes are made in our regular tone-woods: Grenadilla, Mopane and African Olive. For special tone-woods like Pink Ivory, Kingwood, Verawood or other, please ask about availability and price. Rings and detail are in sterling silver or contrasting flute wood, the latter being reinforced with carbon-fibre. If requested faux ivory can be used for flute detailing.

The Windward Combo is a six piece, dual pitch patented Windward Pratten, playable in both D and Eb scales and available as a keyed or keyless instrument.

The Windward C Flute is a keyless instrument, with a single centre section, smaller toneholes and a shorter foot-joint than the Pratten. But the C flute has a strong tone, excellent harmonics and a rich clear voice. It can be ordered with a single footjoint key.

On our simple system keyed flutes, the keys are mounted on integral wooden key-blocks, which have been milled directly out of the centre-joint and foot-joint wood blanks. The keys are hand forged sterling silver, having phosphor-bronze springs, brass axles, and Valentino pads for a good seal and longevity.

Orders, deposits & payments
To initiate an order, and cue the order into our production schedule, a deposit is required. Please deposit \$1000 for a keyed flute or \$800 for a keyless flute. The balance will be due when your flute is completed, and the flute will be shipped when we receive the balance payment. If an order is cancelled, a non-refundable amount of the deposit (\$175 for a
keyless flute and \$350 for a keyed flute) will be retained by Windward Flutes.
———— Wait Time
For a keyed flute, the wait time is 24 to 30 months from the date you finalize your order specifications.
For a keyless flute, the wait could be as short as one week or as long as one year. A keyless flute can be obtained immediately, if there is a flute to your specifications in stock. If not, the wait time will depend on whether or not the flute you want is in the current production batch, and how soon it can be tested, subsequent to its completion. Contact us for availability.
Repair & Restoration
Repairs, restoration and workshop consultation are billed at \$75 per hour, with a minimum charge of \$125.
Initially we evaluate the flute at no charge and discuss our findings with the owner. After accepting the job, we perform an in-depth examination, and consult with the customer about the list of proposed repairs, proceeding with the work only with the authorization of the customer. At this point, the charges are approximate, as it is possible that the final tally may differ somewhat from the estimate. The actual cost of repairs can not be determined until the work is finished.
Materials and parts are billed as a separate cost.
——————————————————————————————————————

Postage, shipping, handling and insurance will be charged to the customer.

We use FedEx as our primary international shipper, and Canada Post Express or Canada Post Priority, for shipping within Canada. The customer can request a preferred method of shipping if they wish. If damage occurs during shipping, we will provide any relevant documents we might have to help the customer with a claim.
